

A rustic interior scene featuring a brick wall background. In the foreground, a dark wooden table is surrounded by yellow chairs with metal frames. To the left, a bar counter with a white tiled front and a wooden top is visible, with a yellow bar stool in front of it. On the wall to the left, there is a wooden shelf with various items, including a lantern. To the right, two wooden skis with blue and white graphics are leaning against the brick wall. The lighting is warm, with several pendant lights hanging from the ceiling.

CONGRATULATIONS

YOU TOOK YOUR FIRST STEP TOWARDS GOING SOLAR

Across India, families are realising the benefits of going solar. From savings on energy bills to saving the planet, clean energy makes absolute sense.

SOLAR ADVANTAGES

GREAT FOR THE PLANET

When we can pollute on an individual level, we can reduce it too. A 3kW solar power plant taking up less than 300 square feet on your roof will reduce your carbon footprint equivalent to driving your car 16,000 kms, every year.

GREAT FOR THE POCKET

With savings ranging from Rs. 40,000 - Rs. 55,000 every year, a 3 KW Solar PV plant provides a low-risk ROI of 20% over 25 years. Low-risk because the panels come with a 25 year performance warranty and the Sun still has 5 billion years left in it!

Sun silently putting money in your pocket, year after year, would be a great feeling, wouldn't it?

GREAT FOR THE COUNTRY

A 3kW system might just look like a drop in the ocean, considering we would need 10 lakhs of these to meet India's aim at being energy independent. But together, similar drops today account of 15% of Germany's overall power generation. And when 10 lakh Americans can go solar every year, why can't we? After all, we are more in numbers. Be the early adopter and lead the way!

GREAT FOR THE FUTURE

Your power supplier has ZERO competition. In other words, you have ZERO influence on how much they charge you. If you have noticed, power tariffs have more than doubled in the last 10 years. Solar is a great way (maybe the only way) to safeguard yourself against future price hikes.

Generation Guarantee

Zolt gives you a generation guarantee of 1500 units/kW/ year*. Any shortfall in generation is paid by Zolt at Rs. 10 per unit. A gorgeous way to get an annual return of up to 20% on your investment.

*- Zolt Generation Guarantee for six years is included in the Online Monitoring Add-on Package. Terms & Conditions apply.

PowerPlay

All Zolt systems come with default remote monitoring so you can track your generation from your smartphone. And with your neighbours joining the fray (or missing out on it), it will all add up to an interesting conversation. Owner's Pride - Definitely. Neighbour's Envy - You Decide.

YETM

FTON

Free Maintenance

If the system is down, we will know. And most of the times, we would be the ones calling you to schedule a visit rather than the other way around. Even if everything is running alright, we will do a thorough system check every 3 months for the next 5 years.

Better Maintenance = Higher Savings.

Usable Spaces

Aesthetically designed structures create usable spaces instead of occupying it. Use it for your rooftop garden, an extra storage room or just to soak up some sun. We leave it to you. Since you are unique, your solar power plant should be too.

Mr. BVP Raju
10KW, Hyd.
Zolt Customer
since April '15

“Zolt gave me the most transparent pricing and showed integrity

in all their dealings. Would Strongly recommend Zolt to anyone interested in executing projects based on Solar Energy.”

Dr. SS Kuhar
3KW, Del.
Zolt Customer
since March '16

“My bill payment was Zero. Which means, I have generated my

own clean energy that is consumed in my household. I had to just show my roof and the rest was done by Zolt.”

Mrs. Farah
Batool
3KW, Del.
Zolt Customer
since June '16

“We saw the installation at a

friend's place and we felt it was cost effective and space effective. Zolt looked at our space and provided us the best solution for us.”

HOW IT FEELS

Mr. Venkat Rao
1KW, Hyd.
Zolt Customer
since Sept '14

“Finally an affordable proposal and a demo system to

see all those equipment working. I get to know about a power cut only when my neighbour switches on his Diesel Generator.”

Dr. Atul
Kuthiala
5.4KW, Del.
Zolt Customer
since June '16

“They have done a great job.

Whatever they have promised, they are delivering. So if anybody asks if they want to go with Zolt, I tell them to go ahead, with your eyes closed.”

Scan this with your QR code reader to see how Zolt is helping them “Win with Solar” in their own words.

SOLAR MAKES SENSE...

For every Rs. 100 you invest today in solar, Zolt Generation Guarantee⁺ ensures you save Rs. 15 every year for the first 6 years.

For every Rs. 3000 you save using solar, you offset your carbon footprint equivalent to planting 1 tree.

Going Solar means FREE electricity for 20 years and a cleaner world worth hundreds of trees!

Contact us to find out more...

+ Based on standard residential tariff bands in cities in India. Please check with your Zolt solar consultant for plans tailored to your requirement.
